EDUCATION

Al Akhawayn University	Ifrane, Morocco
Bachelors Marketing & Logistics *GPA: 3.5*	Sep 2021 - Jun 2025

WORK EXPERIENCE

eProgram	Casablanca, Morocco
Full-Stack Web Developer | Intern	Dec 2023 - Mar 2024

- Built & delivered a dynamic HR Portal for companies such as OCP, using the Javascript frameworks React & Next 14.
- Constructed & adapted an e-commerce payment system for customers utilizing Next.js for versatility.
- Delved into a new development framework, remix, demonstrating the ability to adapt and thrive in new environments.

Freelance	Remote, Morocco
Full-Stack Web Developer	Dec 2023 - Mar 2024

- Specialized in designing and developing e-commerce stores for various agencies, leveraging advanced CMSs such as Shopify, and Sanity to enhance user experience and boost client sales.
- Delved into new frameworks, libraries, and ORMs to meet client needs such as Medusa.js, Prisma, and Drizzle.

DyslexAI	Morocco | United Kingdom
Designer & Developer	Dec 2023 - Mar 2024

- Developed a marketing web app that optimized SEO performance to enhance outreach to prospects
- Ranked in 1st place in a startup competition featuring around 100 startup company participants from Al Akhawayn University.
- Organized an AI related Hackathon at Al Akhawayn University hosting close to 100 Moroccan students; leading them in the span of 3 days to develop AI Related Web Apps.
- Pitched in the ed-tech institution BETT 2024 about an AI-Powered education program to investors

PROJECTS

Library Web App	github.com/adamdokmak/library-app-react

- Developed a functional library management web application featuring dynamic content manipulation, sorting, and cart functionalities.
- Utilized JavaScript for complex logic operations and API integration to fetch and display book data from a local database, enabling features like price filtering and rapid navigation.

Movie Database *Next.js, tailwind, firebase*	github.com/adamdokmak/netflix-clone

- Engineered a fully functional movie database, incorporating user authentication features such as sign-up, sign-in, and sign-out, ensuring persistence across sessions.
- Replicated Netflix's user interface, utilizing advanced front-end technologies and design principles for seamless user interaction, including features like "add to list", search, data filtering, and trailer previews.
